

Capability Statement

Austin Air Systems is a small business that has been based in Buffalo, New York, since 1990 and was the first manufacturer of high-end residential HEPA and carbon air purifiers. Johns Hopkins University has chosen our medical-grade air purifiers to conduct multiple clinical trials which have proven that our purifiers successfully reduce asthma attacks and respiratory problems. Our on-going research keeps us in close communication with respiratory experts and the medical community and we are frequently learning of new ways to help more diverse groups of people, to include recently the chemically sensitive with our Healthmate Plus™. We have provided purifiers for emergencies in the past working with FEMA and the American Red Cross.

CAGE: 3JNL2 **DUNS:** 622149680

NAICS Codes: 335210, 333413, 333999, 423620, 443141

Core Competencies

Medical Grade Air Purifiers and Filters:

- Standard Series - Ideal for individuals or families with severe allergies and asthma, chemical sensitivities, or chronic illnesses such as COPD.
- Junior Series - Ideal for individuals or families with slight sensitivities to airborne contaminants. Designed for smaller spaces.

Past Performance

Provided to Calhoun County, Alabama, through FEMA - 28,000 Air Purifiers

Southern Ca Gas Co - Porter Ranch Gas Leak - 10,000 Air Purifiers Provided for Residents

American Red Cross - During 9/11 Emergency Provided 10,000+ Air Purifiers to New York City Residents
