

Capability Statement

M. A. Studio Inc was founded in 1971 and provides EcoPod prefabricated modular housing internationally. A forty year background in progressive design and manufacturing has prepared us to be leaders in the industry with the integration of proven and innovative planning and materials. We focus on potential life-saving solutions for disaster relief and humanitarian assistance. Our team combines in-house capabilities with supplier partnerships to offer quality, affordable housing that has superior long-term structural integrity.

Differentiators

40 years of design and manufacturing has honed our skills to design for disaster relief.

EcoPod units can be ordered in varying stages of completion, from a basic shell to a complete finished unit.

EcoPod units can be delivered to a site ready to use or as a kit that can be assembled in just a few days.

EcoPod units offer a permanent solution for temporary housing!
