Company Overview

Disruptive Construction LLC is a general contractor specializing in commercial and residential construction, management, and design. We serve our clients with a high-quality and on-time build within their budget—most of which span from project conception to completion. We specialize in building homes utilizing marine shipping containers or prefab insulated, structurally-sound metal panel systems for quick, secure, watertight, and energy-efficient construction. We hand-pick our team of architects, engineers, designers, and subcontractors based on our clients' needs, vision, and budget. Disruptive Construction serves as the construction manager and general contractor, employing skilled craftsmen and specialty tradesmen. Each project is a partnership between the design team and owner.

Core Competencies

FEMA-certified 320ft² 2BD/1BA eco-friendly housing solutions built out of ISO2000-certified recycled shipping containers.

Differentiators

- Our units incorporate a water UV-filtration system to combat pathogens that may exist in municipal water due to overburdened treatment facilities
- Our units meet or exceed municipal building codes and are approved by FEMA.

Past Performance

- The Pod Restaurant, San Antonio, 20x containers, 2 stories high
- San Antonio - Home Built - 3,000 sq feet - sold for \$720,000
- Donated units - Hurricane Harvey - Houston, TX
