

## Company Overview

Serendip is known for building high-quality code because it practices test-driven development to pull quality upstream so we are thinking of quality while developing software. Serendip is also known for bridging the gap between business problems and technology.

The two Pillars of Serendip are "Communication" and "Quality" - Serendip applies both these principles to drive successful outcomes.

By bringing the highest quality code to businesses around the world, Serendip is changing the culture of software engineering and delivery.

Contact us to help you move quickly and confidently with your federal needs.

## Core Competencies
