Company Overview

Established in 1991, Jali Medical is a company at the cutting edge of the emerging field of non-invasive brain stimulation. Specializing in technologies Transcranial Magnetic Stimulation (TMS) and Transcranial Electrical Stimulation (tES), Jali Medical enables neuroscience research and clinical treatment at hundreds of universities and medical centers nationwide by providing equipment, training and research support.

Our product portfolio includes class-leading equipment for brain stimulation, electrophysiology (EEG, EMG), neuronavigation, eye-tracking, cognitive and movement assessment.

Jali Medical also offers professional consultation for neuroscience researchers with the goal of accelerating data collection and improving experiment quality.

We are committed to providing our clients with high-quality neuroscience equipment and accessories available. Our devices have been used in hundreds of seminal research studies and are the equipment of choice for premier clinical institutions.

Core Competencies

Research/Clinical Products Distributor

- Transcranial Magnetic Stimulation (TMS) Products
- Neuronavigation Products
- tDCS Products
- EEG Products
- EMG Products
- Eye Tracking Products
- Brain Function Assessment

Consulting Services

- Hardware/Software Integration
- Experimental design
- Scientific literature reviews
- Regulatory assistance with the IRB process

Differentiators

- Established in 1991
- 29+ years of experience
- FDA compliant
- Extensive industry experience
- Collaborate with researchers/clinicians
- Highly effective solutions
- Flexible Neuro-Tech support
- Excellent client support
