

Jireh Corporation of Georgia

"A Providing Company"

Jireh Corporation, founded in 2007, was created with one goal in mind; to provide top quality housing with high level services. It is our mission to promote self - sufficiency and neighborhood revitalization to enhance local communities. With our implementation of our Righttouch Life Center on the grounds of our high - profile housing, we are able to implement holistic care through various services on site. Doing so plays a major role improving the quality of life for not only those who are living in the area, but those in surrounding communities as well. JCOG has also become a provider of quality laboratory services through its franchise acquisition of Arcpoint Laboratory.
