

**CAGE Code: 7RGM2**  
**DUNS Number: 080381126**

## **Capability Statement**

### **Company Overview**

Proximie is a technology platform that allows clinicians to virtually ‘scrub in’ to any operating room or cath lab from anywhere in the world. By empowering clinicians to share their skills in real-time, we can reduce variation in care and ensure every patient receives the best healthcare every single time.

Proximie optimizes operating rooms by harnessing the power of 5G and Space Technology. We utilize a 2-way real-time audio and simultaneous feed to allow surgeons to ask questions and put their hands into video during surgery. The Proximie team consists of 25 highly-skilled professionals who have impacted over 11,000 lives and are on the continuous mission to help health experts using ground-breaking technology.

### **NAICS Codes**

423450	541990	425110
518210	541511	446119
423430	335999	511210

### **Core Competencies**

Software Solution	Live Remote Preceptorship	Overlay of 2D & 3D Models
Virtual Collaboration	Live Remote Proctorship	Augmented Reality Tools
Mixed-Reality Technologies	Live Remote/Support	
Clinical/Medical Education	2 Way Real Time Video/Audio	

### **Differentiators**

- 25 highly-skilled employees
- 11,000+ lives impacted
- Mission: help health experts save lives using ground-breaking technology
- Optimize operating rooms and CATH labs
- Harness the power of 5G & Space Technology to help solve connectivity problems in healthcare
- 2-way real-time audio | Simultaneous feed
- Operating surgeon is able to ask questions in real-time
- Able to record and create a curriculum library
- Augmented reality - ability to put their real hands into video during surgery to allow surgeons to annotate and telestrate
