

## Company Overview

Since 1950, Midwest Alarm Services has been providing life safety integration solutions to our clientele. Our team of detail-oriented professionals has over 50 years of combined industry experience and offers an array of specialties.

Our services include fire alarm design, engineering, and monitoring; fire inspections, call systems, and accompanying offerings. In addition to our diverse skillset, we are fire alarm certified in a plethora of states across the US and hold several certifications and memberships that further support our abilities and industry knowledge. We look forward to servicing and developing a long-lasting relationship with your organization.
