COMPANY OVERVIEW

ScanStar LLC offers Design Consulting services for Architectural, Engineering & Construction industries such as Design-Build and Design-Bid-Build companies, or Engineering Firms. We utilize state-of-the-art technology to render topographic maps for Existing/Greenfield sites and point clouds of As-Built structures at Survey-Grade accuracy. We also provide CAD based 3-Dimensional Models and Documents for Conceptual based designs and Bid Packages.

We have 10+ years experience in grain and material handling, as well as feed and food-grade mill planning & design, however our design experience also extends into the Residential & Commercial sectors as well. ScanStar is comprised of highly qualified professionals with decades of experience in leadership, developing industry-related relationships and setting the standard on every project.

CORE COMPETENCIES

- Agricultural Industrial Planning & Design
- Topographic Mapping
- Geospatial As-Built Point Clouds
- CAD Based 3D Exhibits And Conceptual Models
- Terrestrial Scanning
