

TVM Design & Drafting Services, LLC

COMPANY OVERVIEW

TVM Design & Drafting Services, LLC offers personalized design and drafting to the oil and gas industry. Our team of highly skilled design professionals can take your concept and turn it into a reality. We are proficient in the design of Compressor Stations, Gathering and Transmission Pipelines, Processing, Fractionation, Treatment and Storage. Our team has the capability to handle a wide range of projects including, but not limited to, redlines on process drawings, station tie-ins, skid design, and full-scale facility design. The designers at TVM Design & Drafting Services, LLC take great pride in the quality of work they produce and strive to demonstrate how going small can be a huge benefit to your company.

As a WBE/WOSB Certified company, we would be glad to provide more information about federal contracting opportunities.

DIFFERENTIATORS

- We will save you money on every project as we have little overhead and no hidden fees. It is our policy to not “load up” projects with unnecessary personnel that add no value or workmanship to your project.
- Our designers are passionate about quality. We work to maintain the integrity of the engineering while also focusing on accessibility for the field/operations personnel.
- We do not “buy” jobs only to charge for change orders later. Our team works closely with our clients to keep them on target with their budget and navigate any scope changes that may arise during the project.
- We rely on your engineering expertise. Why pay an EPC firm to re-engineer your project in order to get a construction package? Can we provide engineering? Absolutely, but only upon request.
- Our team offers a higher level of flexibility. Due to our organization structure being different to that of a large company, we can make decisions quickly and adapt in a timely manner to ensure a successful outcome for each project.
- We genuinely care. We are all owners of TVM Design & Drafting Services, LLC and are fully committed and vested in our clients, our clients’ projects, and the success and reputation of our company.

CORE COMPETENCIES

- PFD and P&ID Development
- Piping Design
- Civil Design
- Structural Design
- Foundation Design
- Electrical/Instrumentation Design
- Engineering Available
