Capability Statement

Yates Electronic Systems, LLC has been designing and installing security and surveillance systems for residential, commercial, industrial, and government facilities. We are a small/minority-owned security integration company that can provide end to end solutions to meet our clients security needs. Our full in-house capabilities and industry expertise allow us to service even the most complex of projects, while still facilitating cost-effective solutions. We provide fast installation, without ever compromising quality or safety. Please reach out for more information.
