Company Overview

MonarchChem is the manufacturer of Lonarch Brush, Weed, and Grass Killer. We are a glyphosate free herbicide solution that is USA made. With over 35 years of industry experience, MonarchChem set out to manufacture a herbicide that is safer to use but still generates results. The team consists of dedicated and trained professionals who are ready to provide solutions to our partners. Contact us to learn more about our product **Lonarch** and how it is the best option for your herbicide necessities.

Why Lonarch

A growing number of states, municipalities, and school district's are banning glyphosate from being sprayed on public lands. Since Lonarch is a 25b exempt pesticide, it may be sprayed around playgrounds. Lonarch is "safe to spray where children play" and "safe to spray around shorelines". Lonarch is a solution for road, highway, shorelines and railroad right-of-ways.
