Capability Statement

Velofi LLC is a leader in integrated infrastructure and telecommunications solutions across Arizona, Colorado, Florida, Georgia, North Carolina, South Carolina, and Tennessee. We specialize in managing the entire project lifecycle, serving as a single point of contact from heavy civil construction to post-operational management. Our unique position as a self-performing contractor allows us to handle high-complexity fiber optic builds, including all underground trenching, conduit placement, and large-scale material and hardware sourcing. By combining our status as a carrier with a robust supply chain for hardware and electronics, we offer a "dirt to desk" solution that ensures seamless connectivity and maximum operational efficiency.

Core Competencies

Infrastructure and Turnkey Construction: Self-performing underground civil construction including directional drilling, trenching, and conduit placement combined with path design and high-capacity fiber backbone installation.

Network Integration and Technical Installation: Precision installation of internal fiber, Cat6, and low-voltage systems alongside expert configuration of server racks, switches, routers, and secure firewalls.

Security and Access Control: Full-scale deployment of IP and closed-circuit (CCTV) surveillance, biometric entry systems, digital access control, VoIP phone systems, and emergency communication stations.

Hardware Procurement and Supply: Direct distribution of enterprise hardware and infrastructure materials including raw fiber cable, conduit, computers, printers, and networking electronics.

Managed Connectivity and Media Services: Direct delivery of high-speed fiber internet, high-density managed WiFi, licensed music platforms, and bulk digital TV streaming services.

24/7 Managed IT and Support: 24/7 technical support and remote monitoring paired with mobilized on-site response to ensure maximum uptime for critical communication systems.

NAICS Codes

517111 Wired Telecommunications Carriers
517112 Wireless Telecommunications Carriers
237130 Power and Communication Line Construction
238210 Electrical Contractors and Other Wiring Installation
423690 Other Electronic Parts and Equipment Merchant Wholesalers
423430 Computer and Computer Peripheral Merchant Wholesalers
423610 Electrical Apparatus and Equipment, Wiring Supplies
516210 Media Streaming Distribution Services
541513 Computer Facilities Management Services
561621 Security Systems Services

Differentiators:

- Turnkey Infrastructure Development
- Direct-Performance Construction
- Single-Source Accountability
- Accelerated Project Timelines
- Project-Ready Inventory
- Enterprise-Grade Hardware Procurement
- Multi-State Operational Coverage
- 24/7 Customer Support
- Mobilized On-Site Response
- Total Lifecycle Infrastructure Management
