Company Overview

Imua Onipa'a has created and built a Center of Innovation leveraging cutting-edge technologies, based in the heart of Maui, Hawaii. Our mission is to bridge the gap for existing and emerging companies seeking to enter the Hawaiian, Indo-Pacific region, and Department of Defense markets. By providing a comprehensive Center for Research, Development, Testing, and Learning, Imua Onipa'a enables local employees for sales, support, training and adaptation of products and services to these local markets.

At Imua Onipa'a, we offer state-of-the-art hardware and software capabilities, along with world-class testing facilities, spread across over 10 secure and private acres dedicated to physical testing of emerging technologies such as drones, robots, and advanced manufacturing techniques.

Our commitment is to the education for residents of Hawaii and personnel exiting the Military in preparation for careers in High Tech, Management Consulting and for government contracting based in the Indo-Pacific region. As a minority owned business with native Hawaiian trainees, Imua Onipa'a is well positioned for sub-contracting and STTR. With a passion for service and support, Imua Onipa'a is committed to delivering fast, reliable, and secure customer support, backed by the latest technologies and partnerships with product companies.

Our modern manufacturing facilities cater to research and development for light manufacturing, leveraging advanced techniques and software to push the boundaries of what is possible. Beyond product development, we are committed to fostering education and skills training by providing a dynamic learning environment focused on Advanced Technologies, AI, advanced manufacturing software (e.g., inventory management and invoicing), and customer relationship software.

Our expert team is here to support the next generation of emerging Innovators and adapted innovations. For more information about our services or for federal contracting opportunities, please reach out at your convenience.
