## COMPANY OVERVIEW

The Cyber Samaritans is a veteran–founded cybersecurity collective delivering adaptive, intelligence–driven protection. Drawing on deep experience across the intelligence community, special operations, and enterprise cyber defense, the team helps organizations evolve from reactive security to proactive resilience. Core strengths include **Cybersecurity Strategy & Governance, Identity Security, Security Operations, and Executive & Brand Protection**, supported by frameworks such as NIST, MITRE ATT&CK, and MITRE ATLAS. Through Strategy & Governance, we help organizations identify, prioritize, and manage enterprise risk, including those introduced by AI adoption. Our Identity Security practice strengthens access controls and governance, while Security Operations advances detection, automation, and response. Through AI–enabled intelligence and automated takedown operations, we help organizations protect executives, brands, and digital assets from emerging threats.

## CORE COMPETENCIES

- Cybersecurity strategy & governance
- Identity & access management
- Security operations & automation
- Threat detection & response
- AI–Driven Brand Protection
- Zero Trust architectures
- GRC & compliance alignment
- Threat intelligence analysis
- Penetration testing & red teaming

## CONTACT
