Stump Grunts is a veteran-owned and operated land and vegetation management company based in Greenwood, South Carolina. Founded by a U.S. Army veteran who served during Operation Iraqi Freedom, the company is built on the same principles that defined military service: discipline, accountability, teamwork, and mission-first execution.

After transitioning from active duty, the goal was clear: build a land management company that approaches every project with professionalism, precision, and respect for the customer's property. Stump Grunts was created to meet that need and to deliver dependable, high-quality results.

At Stump Grunts, every project is treated like a mission. It is carefully planned, efficiently executed, and completed to a standard we would expect ourselves.

Core Competencies

Forestry Mulching – Efficient clearing that grinds vegetation in place, improving access and land usability without hauling debris.

Stump Grinding – Professional stump removal to restore ground level, eliminate hazards, and improve property aesthetics.

Land Clearing – Strategic clearing for development, landscaping, and property improvement.

Brush Removal – Selective removal of undergrowth while preserving desirable trees and vegetation.

Trail & Access Clearing – Creating or restoring trails, lanes, and access points through wooded or overgrown areas.

Storm Cleanup – Debris and damage cleanup to restore safety and usability after severe weather.
